WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut nine 2,110 mm lengths (the full wall width). Treat them.
Nail a 25 x 25 mm cleat along each side at the bottom edge, full length; the two end joists get one cleat, on the inner side.
On the two joists either side of the fan box, stop the cleat 320 mm each side of the joist's mid-point (shown here).
Joist centres along the store, from its centre: 0, 410, 820, 1,180 and 1,480 mm each way. The fan box goes between the joists at 820 and 1,180 mm toward the door: 310 mm clear.
Each joist bears on the full wall top; one galvanized strap per end, built into the brickwork, nailed to the joist.
Check: tops in line within 5 mm; the fan bay is 310 mm clear.
