WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut two 2,940 mm lengths of 75 x 150 mm; treat the ends.
Each lies on edge across the store on one pair of post cap plates,
sloping 4 degrees down toward the right side.
It overhangs 70 mm past each post centre.
Fix: two M10 x 100 mm coach screws up through each cap plate.
Mark the five purlin positions on the top edge: 700 mm apart
along the slope, the outer two 1,400 mm from the middle.
Check: both beams parallel, 3,700 mm apart centre to centre,
diagonals across the four post tops within 10 mm.
