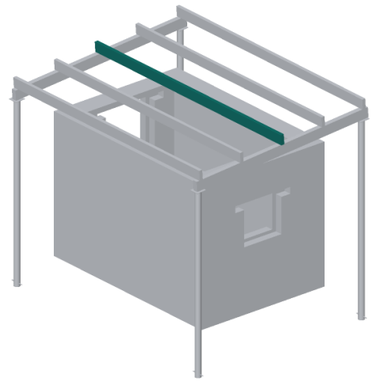
Scale 1:20; looking at the right side (along -X)



WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut five 3,800 mm lengths of 50 x 150 mm; treat the ends.
Each lies on edge across both beams along the store, at the marks 700 mm apart, ends 12 mm past the beams' outer faces.
Fix each crossing with a galvanized hurricane tie rated 2 kN or more, nailed with the tie maker's nails (the wind lifts about 1.1 kN at each crossing, ZBX-CAL-001 section 10).
A 100 mm deep purlin is not strong enough for this span.
Check: tops in one plane within 5 mm (string line across).
