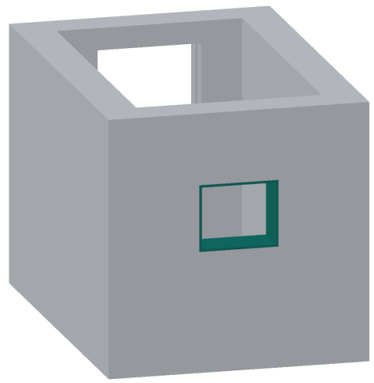
Scale 1:10; looking at the right side (along -X)



WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Sides: two boards 20 x 305 mm, 540 mm long.

Head and sill: two boards 20 x 305 mm, 600 mm long, between the sides.

The lining covers the whole reveal and closes the cavity.

Screw into frame plugs, three per board; outer edges flush with the outside wall face.

Clear opening: 600 x 500 mm, 1,000 to 1,500 mm above ground, exactly the pad's face, so no air goes round the pad.

Seal the lining to the brick with a bead of sealant outside.

Check: square; clear size 600 x 500 within 3 mm.
