WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Battens: two 25 x 50 mm, 585 mm long, plugged to the wall 325 mm each side of centre, from 1,000 to 1,585 mm above ground.
Sides: two boards 25 x 160 mm, 585 mm long, screwed to the battens' inner faces; 600 mm apart inside. In each, drill a 34 mm hole 75 mm from the wall and 516 mm up from the bottom for the drip header.
Top: one board 25 x 160 mm, 600 mm long, between the sides at the top.
Bottom bars: two 30 x 3 mm, 650 mm long, under the sides at 35 and 115 mm from the wall. The pad stands on them.
Front bars: two 30 x 3 mm, 650 mm long, across the sides' front edges, 150 and 350 mm up. They keep the pad in.
Check: inside 600 wide, 160 deep; bars level.
