WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut 740 mm of 32 mm PVC pipe. Cement a cap on the left end.
Drill a row of 3 mm holes every 75 mm along one side, starting 40 mm in from each side board position; deburr inside.
Fit: slide it through both side boards so it lies on top of the pad, holes facing down, and the open end sticks out 75 mm on the right side for the feed hose.
Check: water from a hose runs out of every hole evenly.

ZEERBOX
