WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Fills the room inside the inner leaf: 2,400 x 1,500 mm.
Level the ground inside the walls and compact it hard. Lay a 25 mm sand bed, screeded level.
Lay 75 mm bricks flat, close-jointed, in a stretcher bond; top 100 mm above ground, level with the door sill.
Brush dry sand into the joints and wet it down.
Check: level within 5 mm; no rocking brick.
