WHERE IT GOES

This part in colour, its neighbours in grey

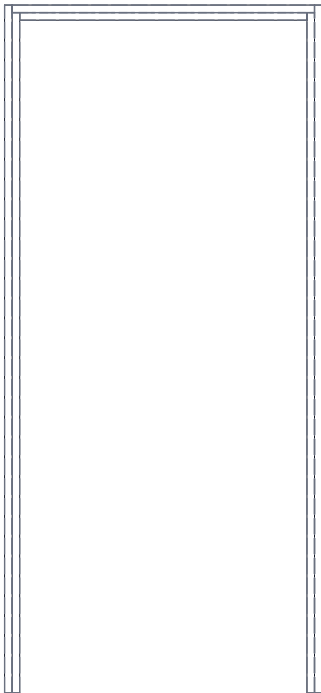

HOW TO MAKE IT AND HOW IT FITS

Jambs: two boards 20 x 305 mm, 1,820 mm long.
Head: one board 20 x 305 mm, 800 mm long, between the jambs.
The lining covers the whole reveal and closes the cavity.
Fix each jamb with five screws in frame plugs into the inner and outer leaves; pack behind with timber wedges until plumb.
Clear opening inside the lining: 800 x 1,800 mm from the floor.
Stop beads 20 x 40 mm on both jambs and the head, 84 mm in from the outside face; a rubber seal along the outer face of the bead.
Check: lining plumb and square (diagonals within 3 mm).
